Address

Tax Computer Systems Ltd
Centurion House
London Road
Staines
TW18 4AX

Tax Computer Systems is the leading provider of corporate tax software in the UK and Ireland. The company was founded in 1991 and is based in Staines, Middlesex.

The company's sole focus is to provide corporate tax professionals with comprehensive technology solutions that are extraordinarily easy and robust to use. We provide software solutions that automate the end to end tax compliance process for all types of business, incorporating year end tax provisioning, HMRC computations, forecasting, tax planning, tax accounting and management of the compliance cycle. Our customers report much-improved efficiency and an equally dramatic reduction in the level of data error when using our products and customers' requirements remain our absolute priority in everything we do.

At Tax Computer Systems we are very proud of what we have achieved but also recognise that our customers will always demand more. To help meet this demand, we employ people who make things happen and back their effort with the highest research and development budget in the industry sector.

From our company office in Staines, we design, develop, test and service the Tax Computer Systems product suite. We outsource nothing. Customer satisfaction reports consistently rate our Professional Services team as excellent. We also have state-of-the-art training facilities. We are recognised as the industry best in the UK and Ireland and are used by practically every large accountancy firm that handles corporate tax work. Over the last few years, we have made significant inroads into the corporate market by meeting their demand for full data integration and online e-filing submissions. We maintain a highly competitive pricing structure for all our products with flexible entry levels.

Because we meet and exceed customer expectation, we have a continuing customer retention rate in excess of 99%.
